

Cooperation with National Diet Library Great East Japan Earthquake Archive (HINAGIKU)

- We extract internet information related to the Fukushima Accident from NDL's WARP²⁾ and create their metadata. Access to the internet information is ever ensured by putting link information (URL of appropriate information in WARP) into the metadata.

2) Web Archiving Project (WARP) (http://warp.da.ndl.go.jp/info/WARP_en.html)

NDL has started WARP since 2010. In this project, NDL collects information in the form of website of the following: the government, the Diet, the courts, local governments, independent administrative organizations and universities.

- We will not only put the metadata on JAEA's website but also provide metadata to NDL Great East Earthquake Archive (HINAGIKU) (<http://kn.ndl.go.jp/node?language=en>) so that many users could make use of them.

It is possible to access information related to the Fukushima Accident via National Diet Library Great East Japan Earthquake Archive (HINAGIKU) by providing metadata to HINAGIKU.
