

# Nuclear Non-proliferation and Nuclear Security Human Resource Development at Universitas

**Naoko NORO**

*Integrated Support Center for Nuclear  
Nonproliferation and Nuclear Security*

*Japan Atomic Energy Agency*

**JAEA International Forum  
Panel Session**

**December 10, 2024**

# Discussion Point 1: Nuclear Non-proliferation and Security HRD at University

## Models of HRD in University

### 1. Professional Graduate School Model

- Specialized programs offering degrees in nuclear non-proliferation and/or nuclear security
- e.g. Bulgaria: Master's course in Nuclear Security at University of National and World Economy (1.5 years)

### 2. Laboratory/Seminar (research group) Model

- Laboratories/Seminars on nuclear non-proliferation and/or nuclear security
- Example: Tokyo University of Science (formerly Tokyo Institute of Technology)

### 3. Nuclear Energy Related Course Model

- Add nuclear non-proliferation and/or nuclear security to existing curriculum as part of nuclear energy major

### 4. Specialized Lecture Model

- Offering a series of (or an independent) lectures on nuclear non-proliferation and/or nuclear security
- E.g. nuclear non-proliferation and/or nuclear security as a part of nuclear fuel cycle course, or international law

### 5. General Education Model

- Lectures on nuclear non-proliferation and/or nuclear security in liberal arts courses as literacy, regardless of department or major

### 6. Summer School Model

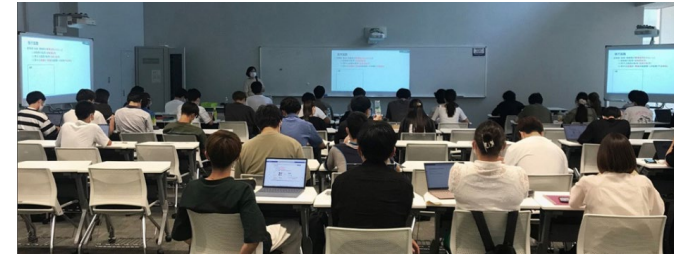

- Short-term intensive course
- E.g.. ISCN Summer School

What is the best model for Japan and Asia to solve the current challenges?

# Discussion Point 2: University Support by ISCN/JAEA

- **Support based on cooperation agreement**
  - ✓ Providing lectures and practical training on nuclear nonproliferation and nuclear security
  - ✓ Accreditation course
- **On-site lecture by ISCN experts**
  - ✓ Nuclear non-proliferation, nuclear security, nuclear disarmament, etc.
  - ✓ Independent class or a series, non-credit
- **ISCN Summer School**
  - ✓ Aug-Sep.: Summer School or the student intern at ISCN by JAEA Summer holiday internship program. Offers lectures, technical tour of ISCN training facility (ISCN Exercise Field), group discussion
  - ✓ Nov-Dec.: Discussion Session by students on a specific topic
  - ✓ Dec.: Student representative joins JAEA International forum as a panel to report the result of Student Discussion Session
- **Joining International Nuclear Security Education Network (INSEN), May 2024**
  - ✓ Aiming at strengthening support for university by collaboration with INSEN
    - Sharing good practices of INSEN members
    - Joint curriculum development for universities

## Discussion Point 2: Implementation of a Series of Milestone Events

- Fall 2025: hosting INSEN Annual Meeting in Japan
  - A program for Japanese universities (faculty, students) in addition to the Annual Meeting program
  
- 1Q 2026 (TBD): National Symposium with INSEN experts
  - Sharing good practices in other countries
  - Exchange between INSEN experts and domestic students
  - Develop and provide educational materials for the domestic universities based on the knowledge gained through the symposium

2026 (TBD): hosting Marie Skłodowska-Curie Scholarship Program (MSCFP \*) School

- Focusing on nuclear non-proliferation and nuclear security

\*MSCFP: Scholarship program for the young female researchers in nuclear science and technology area in graduate school.
