

Group 3 Req. for CoolRep 1(2)

- Define clearly what is the “CoolRep”
- Explain the overall KMS with links to its sub-part modules
- Mining and communication tool
- Currently not a tool for updating/importing information — should it be?
- Main users seem to be
 - i) reviewers (regulator, internal reviewers, managers)
 - ii) Provide structure to safety case developer
 - Role of general public must not be overstated - important to provide access - but few will be interested in all details

Group 3 Req. for CoolRep 2(2)

- Mining tools of safety case/ elements of safety case:including,
 - Argumentation chain
 - Data assignment
 - Abstraction
 - QA
 - Decision-making
- Communication of safety case/ elements of safety case:
 - But what is the work load to answer?
 - Capture-feedback for safety case:
 - Should clearly show how specific argument/data affect/not affect safety
- User-management system including the presentation results for different class of users
 - Mining tools under professional judgment
 - Communication tools between professionals/general public
 - Well managed Question/Answer system
