

* Rock Mass Classification: Degree of physical disintegration by weathering/alteration in 6 classes; roughly, A (very fresh), B (slightly weathered/alterned), CH (weathered/alterned except quartz), CM (moderately weathered/alterned), CL (highly weathered/alterned), D (extremely weathered/alterned)

** Weathering and Alteration: Degree of weathering and alteration; classification simplified from on-site core description manual (JNC, 2002)

Fracture zone Leaching zone
Low-angle fracture zone
